Education

Lovely Professional University

B.Tech in Computer Science & Engineering

Aug 2023 – Present

CGPA: 7.82

Delhi Public School

Intermediate: PCM

Mar 2020 – May 2021

Percentage: 92.6

Delhi Public School

Matriculation

Mar 2018 – May 2019

Percentage: 92.2

Technical Skills

Languages: Java, C++, Python, C, JavaScript, HTML, CSS, PHP

Tools/Platforms: CMake, PCAP, Docker, Kubernetes (K3s), Terraform, Jenkins, Prometheus, MongoDB, Git, Postman, Vercel

Frameworks: Node.js, Express, Flask

Projects

Packet Analyzer & Deep Packet Inspection Engine 🛡️ | C++, CMake, Multithreading, Python, PCAP June 2026

- Engineered a high-performance, stateful Deep Packet Inspection (DPI) engine in C++ featuring multi-threaded load balancing to process and parse raw PCAP network streams in parallel.
- Optimized throughput by implementing a stateful connection tracker with a "fast-path" bypass mechanism, reducing processing latency by 40% for established TCP/UDP network streams.
- Developed a zero-copy protocol parser to decode L2-L4 headers (Ethernet, IPv4/IPv6, TCP/UDP) and integrated a TLS SNI (Server Name Indication) extractor to classify secure traffic without decryption overhead.

Virtual Stylist AI with DevOps & Cloud 🛡️ | Flask, Terraform, Docker, K3s, Jenkins, Prometheus May 2026

- Containerized the Flask-based AI stylist application using Docker and automated cloud infrastructure provisioning with Terraform, ensuring a secure, reproducible deployment environment.
- Engineered a multi-stage Jenkins CI/CD pipeline (Jenkinsfile and Dockerfile.jenkins) to automate integration, testing, and deployment workflows.
- Orchestrated container workloads on a lightweight K3s Kubernetes cluster and integrated Prometheus monitoring to track cluster health and application metrics.

Volunteer Registration System 🛡️ | Node.js, Express, MongoDB, JWT, Nodemailer Nov 2025

- Eliminated manual email follow-ups by implementing an automated notification system using Nodemailer, saving approximately 40% administrative effort.
- Reduced scheduling conflicts by 95% through Mongoose schema validation with real-time event capacity enforcement.
- Designed secure RESTful APIs using Express.js and implemented JWT-based authentication, improving volunteer onboarding by 300% through instant profile creation and protected user access.

Training

Programming Pathshala

Java with Spring Boot

Aug 2025

Achievements

- Published **Focus & Feed** on the Microsoft Edge Add-ons Store using Manifest V3.
- Achieved 5 star in Problem Solving and Java on HackerRank.
- Solved 180+ LeetCode problems.
- Earned 11+ MongoDB Skill Certificates.

Certificates

- HackerRank Python (Basic) Nov 2025
- Java Programming (NeoColab) Jul 2025
- NPTEL Cloud Computing Apr 2025
